

Group Announces A New Website For British Columbi

In navigating the site, one can find how normal active children are forced into taking mind altering and addictive drugs.

September 22, 2008 (FPRC) -- The Vancouver chapter of the Citizens Commission on human rights has erected their new website which, among many other things, allows individuals to view a portion of a hard hitting video documentary that exposes the psychiatric industry as a criminal organization and a pseudo-science.

Through rare historical and contemporary footage and interviews with more than 160 doctors, attorneys, educators, survivors and experts on the mental health industry and its abuses, the riveting documentary 'Psychiatry An Industry of Death' blazes the bright light of truth on the brutal pseudo science and the multibillion dollar fraud that is psychiatry.'

The site has many features, including a page where anyone can report an abuse by a psychiatrist or other mental health practitioner, information on the damaging effects of psychiatric drugs and a complete history of governmental warnings regarding psychiatry's drugs since 2004.

Brian Beaumont, the president of the Vancouver chapter of CCHR and webmaster said, 'We are very proud of our new site. It documents how psychiatry's ability to convince drug companies and governments to pour billions of dollars into its practices is based upon fraudulent 'diagnostic' criteria and how psychiatrists package various behavior and emotional characteristics and falsely categorize these as a 'disease' or 'disorder'. It gives evidence that there isn't a single aspect of behavior that doesn't fall within the broad 'symptoms' which comprise so-called 'mental illness.'"

In navigating the site, one can find how normal active children are forced into taking mind altering and addictive drugs with damaging and sometimes fatal consequences and their parents are powerless against the coercive onslaught of falsehoods opinions and the 'chemical imbalance' hoax which is foisted on them as 'fact'. In addition, there are the elderly who are treated with drugs so powerful that it leaves many with permanent physiological damage. Some drug treatments are flanked with the infamous ECT treatments which leave the patients - the ones that survive - with permanent brain and neurological damage.

As a workable alternative, the site has a solutions section where individuals can learn that there are better ways of dealing with life's problems than being falsely labeled and drugged. Thousands of people around the world have recovered from mental disorders and now enjoy the simple pleasures of a drug-free life. Most were told this was impossible.

The Citizens Commission on Human Rights was established by the Church of Scientology to investigate and expose psychiatric violations of human rights. View the new website at <http://www.psychharm.ca>
