

Group Announces New Web Site Domain

The new site allows individuals to view a riveting video documentary, "Making a Killing, the untold story of psychiatric drugging".

October 5, 2009 (FPRC) -- A video interview by Dr. Ross can be seen on the new expanding web site of the Citizens Commission on Human Rights of British Columbia. There is also a new video which exposes that all the side effects of antidepressant drugs are documented by the US FDA; including suicidal and homicidal ideation, mania, psychosis, worsening depression, panic attacks, emotional numbing, hallucinations and delusions.

The web site allows individuals to view a riveting video documentary, "Making a Killing: The Untold Story of Psychotropic Drugging", which exposes the field of psychiatry as a money-grubbing industry dedicated to making a profit at the expense of the mental health of their own patients.

Brian Beaumont, the president of the Vancouver chapter of CCHR and webmaster said, "We are very proud of our expanding web site with its new adverse reaction search engine and two new videos and other documentaries.

In navigating the site, one can find how normal active children are forced into taking mind altering and addictive drugs with damaging and sometimes fatal consequences and their parents are powerless against the coercive onslaught of falsehoods opinions and the "chemical imbalance" hoax which is foisted on them as "fact". In addition, there are the elderly who are treated with drugs so powerful that it leaves many with permanent physiological damage. Some drug treatments are flanked with the infamous ECT treatments which leave the patients - the ones that survive - with permanent brain and neurological damage.

As a workable alternative, the site has a solutions section where individuals can learn that there are better ways of dealing with life's problems than being falsely labeled and drugged. Thousands of people around the world have recovered from mental disorders and now enjoy the simple pleasures of a drug-free life. Most were told this was impossible.

The Citizens Commission on Human Rights was established by the Church of Scientology to investigate and expose psychiatric violations of human rights. View the new website at <http://www.cchrbc.ca>
