

International Moving Company Offers New \$500 Flat Fee Shipping Service For Those Moving To UK

Worldwide moving and shipping company, NY International Shipping, announces a new flat rate service for those moving to the UK. For just \$500, customers can ship up to 50 cubic feet of belongings from NYC to the UK.

July 15, 2010 (FPRC) -- NEW YORK, NY -- Leading international moving company, NY International Shipping, has announced a new, flat fee shipping service for those moving to the United Kingdom. For a flat rate of \$500, NY International Shipping will ship household goods from the company's warehouse in Jersey City, NJ to their warehouse in the UK. For customers who have more than 50 cubic feet of goods, NY International Shipping offers additional low-rate price points.

The flat rate shipping solution derived from the company's desire accommodate those who are relocating to the UK and have small shipments that are too expensive to ship via Postal or UPS and that do not meet the required minimum for most worldwide moving companies.

The \$500 flat rate UK shipping price includes:

- * Shipping of materials up to 50 cubic feet from the company's NJ warehouse
- * Consolidation of goods into the shipping container
- * Ocean freight fees
- * US Customs clearance
- * Receiving fees
- * Delivery of goods to the company's UK warehouse

For an additional \$295, NY International Shipping will deliver goods directly to the customer's new UK residential address.

"People tend to accumulate personal belongings while living in the states -- and when its time to get back to the UK they can't fit it all on the plane. They are hit with sticker shock when they learn it costs up to \$500 per box shipping it via post office, UPS, or FEDEX and that most international moving companies offer a minimum of 150 CF, which will end up being at least \$1400," said David Mazafi, CEO of NY International Shipping.

"However, since the UK is one of our most shipped to destinations and we have weekly consolidations, we have decided to accommodate those who fall between most international moving companies minimum and post office carriers. The result is our flat fee, which includes all documents and US port fees for those who have up to 50 cubic feet of goods."

In addition to the company's warehouse to warehouse shipping option for those moving to UK, NY International shipping offers additional low cost, flat rate shipping plans including a 'curbside to curbside' solution and a 'curbside to warehouse' solution.

With the 'curbside to curbside' solution, customers within NYC can pack their belongings into proper moving boxes that will be picked up from their curbside residential address and delivered directly to their new UK residential address for a flat rate of \$995, including export documentation and US port

fees. The 'curbside to warehouse' solution allows for curbside pickup within NYC with delivery to NY International Shipping's UK warehouse for a \$775 flat fee.

Customers are encouraged to add all-risk marine insurance to any shipping package for an additional 3% of the content's declared value.

"We are passionate about our dedication to personalized and professional service -- and stand behind our word with a guarantee. Our goal is to accommodate all customers, from students who have tight budget to luxury moves where customers have us take care of everything for them. We understand that we are moving more than household goods, we are moving lives," Mazafi added.

In addition to the company's flat rate fee for NYC to UK shipping, NY International Shipping offers customized worldwide moving solutions. Whether it's an individual moving overseas for a few months or a family relocating internationally indefinitely, NY International Shipping tailors a solution for each unique situation. NY International Shipping experts assist customers throughout the entire process, overseeing all of the logistics and assuring that every international relocation goes smoothly.
