

Dynacyle Oil out Performs Harley-davidson Screamin Eagle SYN3 Motor Oil

Dynacyle Oil Reduces Engine Friction and Increases Horsepower and Torque in 4-Stroke Engines Better Than its Competition

July 16, 2010 (FPRC) -- JAMESBURG, NJ - The Dynacyle Oil Company is announcing that their product, Dynacyle Oil, has out performed Harley-Davidson Screamin Eagle SYN3 in recent independent dynamometer testing under accelerated conditions. The test, conducted on a Dynojet 250i dynamometer using a 2009 Harley-Davidson FXDFSE as a mule, measured an increase of an additional 2.25 more horsepower and 1.9 more pounds of torque just by changing the oil to Dynacyle.

The Dynacyle Oil Company is a biker owned and operated business established in 2003. Our product, Dynacyle Oil is a premium 20W-50 semi-synthetic blend motor oil specifically formulated for all 4 stroke air and water cooled motorcycle and performance engines. It combines the performance advantages of a high quality synthetic formulation with the economical price of petroleum. It provides shear and oxidation stability, superior anti-wear and deposit control for premium lubrication performance and engine protection. Its superior protection reduces engine friction thus decreasing temperature and wear and increasing horsepower and torque.

The recent independent Dynojet 250i dynamometer testing was conducted by Jim Kallay, owner of Phantom Rider Choppers, located at 6535 W State Highway 46, New Braunfels, TX 78132. Jim is a Certified Harley-Davidson Technician, MMI 4.0 GPA Dynojet / Power Commander Tuning Specialist, and an Approved Dynojet Tuning Center with Tuning 'Link' and Authorized Power Commander Dealer with 30+ years repair, service and build experience. His business telephone number is and website is (830) 228-4606 and <http://www.phantomriderchoppers.com>.

Dynacyle Oil has a loyal following of satisfied users such as Kevin Mahon of the Police Motorcycle Maintenance & Repair at MobileMech, Inc. Kevin says that after he independently tested Dynacyle Oil, 'The Cylinders actually looked cleaner than prior to the test. I was very skeptical of any oil product claiming to lower engine temperature. I won't use oils in the air cooled motors I'm responsible for that use Teflon or Graphite. I'm convinced and I now use Dynacyle Oil in my personal motorcycle.'
