

RF Connectors, Cables, and Cable Assemblies - RFCables.org Updated

RF Cables.org offers worldwide RF & microwave connectors and cable resources. Member registration is free, and registered members will be able to submit their products and services.

January 7, 2011 (FPRC) -- The website RFCables.org has been updated for better features and improved navigation. The website offers various RF Microwave connector manufacturers, and rf cable vendors.

The site has the following sections:

- * rf Companies, This section provides various rf cable and connector manufacturers worldwide. 400+ vendors have been listed so far.

- * rf and Microwave Products: The products section covers several categories including rf cables, optical cables, rf and option connectors.

- * Cable Assembly and Testing Services: The services section provides various services offered by product vendors and service providers, such as coax cable assembly, custom cable manufacturing, etc.

- * Articles on RF and Microwave Cables and Connectors: The section provides various articles on rf cable measurements, instrumentation, and rf cable assembly techniques.

- * rf & microwave cable measurement tools: This section provides tools for computation of VSWR, Return Loss, Reflection Coefficient, and others. New tools are added from time to time.

Free Registration: Visitors can register for free and post relevant company information. After simple registration, one should be able to showcase their products, articles, services, and any other information on the website. Members will also be able to edit or delete their submissions at any later date.

Free submission and update: The products, services, and articles submitted can be submitted free of cost, and provides global exposure. The unique features offered include product/profile page views, clicks, and featured products/companies.

The website is maintained by Anand Software and Training Pvt. Ltd. <http://www.anandsoft.com>, a Bangalore based company, involved in software development, web development, wireless networking, and certification training.
