

## **Maybach 62: Timeless Design Crafted for the Upper Class**

*Maybach introduces the Maybach 62 facelift: opulent spaciousness and outstanding engineering that ensure unrivalled levels of comfort in this exceptional chauffeur-driven vehicle.*

January 17, 2011 (FPRC) -- Following the 2010 facelift, the Maybach 62 model enriched its distinctive and self-assured design, emphasized by the impressive overall dimensions and clever use of the inner roominess. The dazzling, sumptuous appearance of this Maybach model can be further enhanced choosing the optional two-tone paint finish, a distinctive mark of timeless style that makes the distinctive profile of the Maybach 62 absolutely eye-catching, a contemporary interpretation of elevated status, without fear of self-indulgence.

Superior comfort is ensured by the vast array of opulent features available in the exceptional roominess of the rear passenger compartment, unique in this class of vehicles. The rear passenger compartment of the Maybach 62 is the perfect setting for those privileged ones who want to experience travelling at the uppermost levels of luxury and cosiness. In fact, the comfort dimension that is possible to feel in the Maybach 62 model appears clear as soon as you lie back on the legendary reclining rear seats with footrests and legrests, perfectly upholstered in soft Grand Nappa leather: at the touch of a button the padded support gently deploys to allow the changeover from the normal sitting position to an incredible relaxing reclined position which allows maximum relax, even during a short journey.

The dedication of designers and interior appointment specialists to create a luxurious ambience is clearly visible and further enhanced by sophisticated details like the optional electrotransparent partition, that can be embellished with a design of customer's choice and ensures complete separation between the chauffeur and the rear passenger compartment. Passengers can enjoy the first-class entertainment provided by the Rear Seat Entertainment System in absolute privacy: CD-changer, DVD player and connections for MP3 player in combination with the compelling audio output of the BOSE® Surround Everywhere™ sound system with Dolby Digital, or enjoy a movie on the optional 19" cinema screen.
