

Conference in Sanya China to Plan the Future of the Environment

DirectRooms.com reports that a worldwide forum, held by the International Conference on Future Environment and Energy (ICFEE) will focus on cutting-edge research into environment and energy sources in the future

January 23, 2011 (FPRC) -- Sanya, China will host the 2011 International Conference on Future Environment and Energy in March. It is one of the most important international conferences of its type for revealing new and urgent advances in the world of future environment and energy. It also aids communication between dedicated practitioners and researchers who are working in a variety of parts of the scientific worlds with a joint interest in promoting environment and energy methods that are most important.

As an international conference that is a leader on the world stages this is a great opportunity for promoting new and needed progress in the arenas of future environment and energy. It also allows communication between researchers and workers working within large and complex variety of areas in the world of science with an interest in improving future environment and energy techniques.

Sanya hotels are able to offer all delegates an impressive line up of places to stay, with a wide range of venues on offer for all budgets and tastes. Sanya offers a great place for delegates at conference to relax following a day debating. Western standards can be met with ease and an impressive amount of choices are available.

Lek Boonlert, marketing head of DirectRooms said: 'This is an important conference which will attract visitors from all over the world.'
