

Windows Phone Area: New Online Magazine is Now Live

Windows Phone Area is live. The online magazine provides news and information dedicated to the Windows Phone operating system. The website carries up-to-date news and articles about popular apps, phone models, accessories and software updates.

August 25, 2013 (FPRC) -- Windows Phone Area, an independent online magazine is now live. Windows Phone Area is a reliable source of fresh information about Microsoft's latest mobile platform, apps, mobile devices and all about Windows Phone. It carries up-to-date news, publications and selected quality articles around popular topics. The Windows Phone Area team consists of technology and phone enthusiasts who came together to create this website.

One of the editors and co-founders Diyan I. says: 'Our main mission is to help other users. We try to present the information from the user's perspective. We write about something only if it is interesting for us, because we are customers just like you. We don't like to read or write boring and insignificant articles. Our website covers different areas. In our "highlights" section you can read about major Windows Phone topics, market and business news, analyzes and all we consider as interesting. The "phone" section is about your favorite smartphone manufacturer. You can read more detailed articles about new and existing devices from Nokia, Samsung, HTC, Huawei and other OEMs.'

'Our mobile experts provide unbiased reviews of selected models. We will publish them in the "Reviews" category. We don't forget that there are many cool phone accessories on the market. That's why we have a separate "Accessories" section where you can read about some new and attractive gadgets and accessories. We also know that there are tons of new apps in the Store. The mobile platform is growing rapidly so Windows Phone Area will try to inform you of any significant changes, updates or brand new apps for your smartphone', says Michael D, one of the co-founders.

We hope you will enjoy browsing www.windowsphonearea.com. This online magazine is for you.
