

Modern Fan Outlet Online Ceiling Fan Store Opens for Business

Modern Fan Outlet, one of the top retailers of ceiling fans in the country, is now open for business on the web at ModernFanOutlet.com.

December 4, 2013 (FPRC) -- Greensboro, N.C. - Modern Fan Outlet, one of the top ceiling fan retailers in the country, announced today that their online ceiling fan superstore, ModernFanOutlet.com, is up and running and open for business. Shoppers to the Modern Fan Outlet website will find a wide variety of ceiling fans for every room in the home, office or retail business. However, what truly sets the company apart from its peers is their focus on modern, contemporary ceiling fan designs from top manufacturers such as Minka Aire, Ellington, Gulf Coast and many others. These fans have clean lines for a sleek look that brings them to the forefront of functional design. They are engineered with quality materials and strong motors that bring with them a new definition for functional architecture.

Modern Fan Outlet has a retail showroom, located in Greensboro, N.C. that opened more than 30 years ago where you will find outdoor ceiling fans, tropical ceiling fans and double and dual motor ceiling fans among their impressive inventory. But, while the retail showroom has served them well, the incredible expansion of the Internet and the online shopping habits of their clients prompted the owners of Modern Fan Outlet to create this new online ceiling fan store to showcase the best contemporary ceiling fans available anywhere.

"We're very excited about opening our Modern Fan Outlet online ceiling fan store," said owner and president of Eller Enterprises, Jeff Eller. "Now our clients can shop from home 24/7, their orders are completely secure, and they can browse for the fan that suits their needs and tastes from our huge online inventory."

Eller also points out that contemporary ceiling fans nowadays are not only stylish and elegant, but they are also energy efficient. "A great new technology in today's modern ceiling fans is DC motor technology." He further explains, "DC ceiling fans use about 1/3 the current of the average traditional motor ceiling fans, and on average move more airflow making them about 3 to 4 times more efficient than fans using 120 volt AC motors." Another advantage of DC ceiling fans is that they all come with full function remote controls (or in-wall remotes) with 6 speeds instead of the 3-speed pull chains found on most other ceiling fans. These fans also come complete with built in converters, which allow for easy installation into any standard 120V power source.

The new Modern Fan Outlet website is without a doubt a one-stop home decorating experience, but for those shoppers that want a pleasant change of pace in the way most online stores treat their customers, the owners of Modern Fan Outlet encourage them to simply pick up the phone and give them a call. They promise you'll soon become a fan of their fans.

About Modern Fan Outlet: Modern Fan Outlet is a retailer of ceiling fans with their specialty being in modern, contemporary ceiling fan styles and designs from the top manufacturers in the industry. The Greensboro, N.C. based company operates an online store where clients can shop and purchase ceiling fans for every taste, style and use. From fans for the home, retail business, or workplace, Modern Fan Outlet has a huge inventory of top named fans to choose from. They offer free shipping on most orders, over 95% of their items are in-stock, and most orders ship within 24 hours.
