

HerAnswer.com Grows Product Line Adding New OHT Peptide 3 Anti-Aging Formula

HerAnswer.com expands their line of skincare products with addition of newly formulated OHT Peptide 3 anti-aging cream.

May 13, 2014 (FPRC) -- Roseville, California - The extensive line of skincare products offered by HerAnswer.com, nationally recognized distributor of healthcare supplements for women, will now include OHT's newly formulated Peptide 3 anti-aging cream. "We are very pleased to offer our customers this incredibly beneficial and restorative skincare product," said Tim Rose, owner of HerAnswer, in referring to OHT Peptide 3 being added to his company's array of personal care solutions.

OHT Peptide 3 is a targeted, multi-layered dermal therapy that diminishes fine lines, reduces crow's feet and wrinkles, reduces sagging and improves the firmness and elasticity of the skin. This new OHT product contains three patented peptides that target both the upper and lower layers of the skin.

"We pride ourselves in being the best source for top quality healthcare products for both women and men so including OHT Peptide 3 to our lineup was a natural fit for us," added Rose.

Peptides are protein molecules that are found naturally in the body. They send out signals when damaged skin needs to be repaired. The three patented peptides used in OHT's new formula are Hexanoyl Dipeptide-3, which speeds up cell renewal for fresher more vibrant skin, Trifluoroacetyl Tripeptide-2, which reduces signs of aging, and Palmitoyl Tripeptide-38, which fills in wrinkles on the forehead and crow's feet.

HerAnswer.com is well-known and highly respected in the health and personal care products industry. "Our focus is always on providing great prices with outstanding customer service. We do not have gimmicks. The price we show is the price our customers pay," said Rose in commenting on HerAnswer.com's customer service policy.
