

XBOSoft Introduces Re-Designed Company Website

XBOSoft, the SF California-based software testing firm, introduces a completely re-designed version of the company's website - XBOSoft.com.

August 22, 2014 (FPRC) -- San Francisco, CA - Software testing and quality control firm, XBOSoft, says that the company has introduced a completely re-designed website. XBOSoft specializes in software test consulting and software testing including mobile application testing, usability testing services, web application testing as well as other function testing services. A spokesperson at XBOSoft said that improvements design and functionality make the new website more seamless and on-brand.

XBOSoft CEO, Phillip Lew, said this in commenting on his company's new site, "We are very pleased with the final result of XBOSoft.com. It much more clearly demonstrates our understanding of our clients' problems and the issues facing them." Additional comments by Lew highlighted improvements to integration with backend systems, which enable faster client responses and easier and more clear navigation.

"In terms of being mobile responsive, context driven and a rewarding user experience, the new site is all that and more," added Lew. In explaining what he means by context driven content Lew went on to describe how the new XBOSoft website will show the most appropriate auxiliary content depending on where a user is on the site.

Anyone visiting XBOSoft.com will find a stronger call to action, easier access to free resources and the new Pricing Inquiry form. This form lets a prospective client submit a pricing request based on their responses to a short list of questions about the specific type of software testing help they require.

About XBOSoft: XBOSoft is a San Francisco, CA software testing firm. Founded in 2006, XBOSoft has expanded with offices now in Amsterdam and Oslo. XBOSoft raises the quality of their clients' software throughout the entire quality lifecycle. From quality assurance assessments and advice on best practices, to implementing process improvements followed by continuous test execution, XBOSoft speeds products to market at the highest possible quality.
