

SimulationExams.com Release Cisco CCDA Practice Tests

SimulationExams.com, a leading practice tests provider, released Cisco Certified Design Associate (CCDA) practice tests with 250+ questions, conforming to the latest exam objectives.

February 13, 2015 (FPRC) --SimulationExams.com released Cisco Certified Design Associate, Cisco CCDA practice tests for thorough exam preparation. The practice tests consist of 250+ questions with detailed answers. The question types offered by the simulator include Multiple Choice Single Answer (SA), Multiple Choice Multi Answer (MA), Drag and Drop (DnD), and testlets.

The simulator mimics the actual exam with similar difficulty level, and exam environment. Further, the test engine offers two modes: Learn mode, and Exam mode. Learn mode is useful for candidates to step through the questions and learn the concepts behind each question. Exam mode is useful for candidates preparing for final exam preparation.

The CCDA exam objectives include the following:

- 10% 1.0 Describe the Methodology Used to Design a Network
- 13% 2.0 Describe Network Structure and Modularity
- 27% 3.0 Design Basic Enterprise Campus Networks
- 10% 4.0 Design Enterprise Edge and Remote Network Modules
- 21% 5.0 Design IP Addressing and Routing Protocols
- 19% 6.0 Design Network Services

The exam engine provides most advanced features like Learn Mode and Exam Mode, Category wise scoring, Detailed score reporting, Review, and other features. Candidates will be able to repeat the exam with bookmarked questions.

About CCDA: Cisco CCDA is among the most widely recognised certifications in the field of network design using routers and switches. CCDA candidates will be able to design small to medium networks for small and large organizations.

Other practice tests available from SimulationExams.com include CCNA, CCENT, ICND2, CCNP, A+ Essentials, and Network+. Please visit the website for complete list of available practice tests.
