

Website Design Hub Singapore Now Offers Bespoke Online Software Packages For SMEs

Website Design Hub Singapore is responding to 21st century business needs by creating bespoke online software for small businesses, helping them operate remotely and easily.

Singapore, Singapore, March 23, 2015 (FPRC) -- In the modern world, businesses are existing increasingly in an online-only capacity, with physical location becoming less and less important. More people are working from home, and more businesses are starting to use cloud computing to share data more readily between hubs. Website Design Hub Singapore is a firm that has provided next-level business websites successfully for over seven years, and has always managed to retain their place on the cutting edge of web design and online marketing. Their latest innovation is to offer bespoke software to help businesses manage their resources remotely.

Already well known and respected in the fields of web design and online marketing, the company has expanded the range of services offered to help give a more complete solution for the modern business, which is increasingly migrating away from the office and toward a cloud based set up. With online software tailored to individual businesses, this set up can be as flexible and robust as possible.

The company has already created bespoke software for Content Management, Inventory Management, Customer Management, Human Resource Management and more, enabling businesses to remotely log in to online software and manage their businesses from the cloud.

A spokesperson for Website Design Hub Singapore explained, "Our bespoke software development service is the latest in a long history of innovative tools that have helped small businesses punch above their weight by being more flexible and agile than their multinational competitors. This next step will really allow businesses to become a truly portable entity, accessible from anywhere yet with the same functionality and advantages of a bricks and mortar business. When combined with our latest responsive web design and internet marketing strategies, we provide the complete set of tools for businesses in Singapore to establish themselves as a slick and efficient competitor with very little set up time."

About Website Design Hub Singapore: Website Design Hub Singapore uses the latest HTML5 language to create responsive websites that help businesses put their best foot forward online. They also provide online marketing, e-commerce, and bespoke online software solutions for SMEs. With seven years' experience in the industry, they are ideally placed to help SMEs compete in the modern online marketplace. For more information please visit: <http://www.websitedesignhub.sg/>
