About ITIL Certification: ITIL Foundation certification is suitable for candidates who require a basic understanding of the ITIL framework and how it may be used to enhance the quality of IT service management within an organization. The ITIL Foundation Certification is also suitable to IT professionals who work within an organization that intends to adopt ITIL and improve the IT services.

Upon successful completion of the education and examination components related to ITIL Foundation certification, candidates gain knowledge and understanding in the following areas:

**Service Strategy:** provides guidance on how to design, develop, and implement service management. It ensures that the overall business aims and strategy is supported by the IT organisations aims and strategy.

**Service Design:** provides guidance on the design of new or changed services for introduction into the live environment.

**Service Transition:** provides guidance on managing change along with risk and quality whilst ensuring IT Operations can manage those changes within the context of the ICT Infrastructure.

**Service Operation:** provides guidance on the day to day management of the ICT Infrastructure. It also contributes to the

**Service Management Lifecycle** for carrying out those processes which contribute to the optimisation of the services provided. Continual Service

Improvement: looks at the Service Management Lifecycle. It identifies opportunities for improvements in the efficiency, effectiveness of the processes and optimisation of the costs associated with service provision.
