

Auto Loan Center Australia Launches Car Loan Calculator for Fast Finance Feedback

Auto Loan Center Australia helps people analyze the deals they are being offered on the site with a new car loan calculator that makes sense of the repayment plan in real terms.

San Francisco, CA - September 7, 2015 (FPRC) -- Automobiles are an essential in Australia, where the vast majority of the landmass is still wild, and individuals can drive for days without seeing another human being. Needing a car and getting one are different things however, and the latter can be made unnecessarily difficult by the process of securing a car loan. Auto Loan Center Australia aims to make that process as easy as possible, and has just created a car loan calculator that helps users parse through the terms offered by their recommended providers.

Autoloancenter users only need to complete their personal details and information on the loan amount they need. They then get dedicated, locally-based vehicle finance advice, complete with quotes from a series of recommended providers who compete to offer the best deal. Through this, individuals get their choice of the most competitive quotes, and the new calculator can help them decide on quotes in even less time.

The car loan calculator enables people to enter the interest rate, the amount, and the repayment time in order to calculate how much the monthly repayments will be, how much the total amount paid to the provider will be, and how long it will take to pay off the loan. This offers complete transparency to individuals.

A spokesperson for www.autoloancenter.com.au explained, "We are thrilled to be able to offer affordable auto loans to thousands of drivers across Australia, and our dedicated team of customer service representatives work tirelessly to hunt down and secure the best deals. This is why we are able to offer our 100% satisfaction guarantee. The new loan calculator is the next step in our ongoing mission to provide the very best customer experience. It enables individuals to get a complete transparent account of the deal they are entering into in seconds. We look forward to being able to help individuals find better deals than ever."
