

## **Clash of Clans Online Publishes New Editorials On How To Play Smarter**

*Clash of Clans Online has created a new suite of original editorials for their blog to help players get the most out of playing the popular multiplayer mobile game.*

San Francisco, CA - September 7, 2015 (FPRC) -- Clash of Clans is a hugely popular, massively multiplayer, online cell phone game. The game sees hundreds of thousands of users every day competing to try and seize territory, conquer new lands, defend their own, develop resources and expand their clan. Doing so, while deceptively simple in execution, has surprisingly complex fine subtleties to success. Clash of Clans Online is an online resource center that helps players improve the way they play the game, both by providing access to free resources, and through a blog that discusses strategy, tactics and more.

The new posts include new Clash of Clans Strategy Guides, including the best ways to defend specific structures and conquer certain levels. They have just published advice on how to best defend a level seven town hall, as well as how to exploit the X-bow glitch and how to optimize resource production in game.

The editorials are written in easy to read, plain English and feature step by step walk-throughs of how to develop in game resources in such a way as to be successful in the main aims of developing and defending territories. The guides also have active comments sections where players fervently discuss the strategies proposed.

A spokesperson for Clash of Clans Online explained, "We are all about generating discussion, and we understand that every strategy can only be successful if those responding to it aren't aware of what the other side is preparing to do. Clash of Clans Online is much more than a resource center, and we hope to be the center of a community of players that welcomes individuals of all levels experience, who just want to get better at playing and have a better experience as a result."
