

## **Forus Living Newly Launched Smart Home Products in Singapore with New Website: <http://www.i-smartliving.com>**

*New smart home product has been launched in Singapore featuring ZigBee technology that enable mobile phone to control and monitor your home.*

October 30, 2015 (FPRC) -- A new series of smart home products in Singapore has been launched by Forus Living Pte. Ltd., in the new website: <http://www.i-smartliving.com>. The smart home products have the recent technology that is the world's most advanced wireless network technology that features near communication, low bit rate and low energy consumption. It is mainly used in the wireless connection with short distance and using ZigBee technology as the protocol. A type of secured and energy saving wireless solution, our smart home technology enable the integration between security, home safety, home appliances, home control and gardening control under one controller by using mobile smart phone technology.

According to the director of Forus Living Pte. Ltd., Steven Chai, the smart home products are most suitable for houses such as bungalow, terrace houses, condominium and HDB flats. He described the smart home idea as the integration of different requirements for home automation and control, inclusive of security monitoring and alert, emergency calling, safety monitoring and alert, home utility control, gardening irrigation control and many more. The smart home automation products was launched in October of 2015, with the detailed information available in the website: <http://www.i-smartliving.com>

There are a lot of benefits from smart home systems in Singapore, that is also in conjunction with the government's vision to establish a smart nation by harnessing technology to the fullest with the aim of improving the lives of citizens, creating more opportunities, and building stronger communities, according to Terence Teo, who is also the director of the company. He also mentioned that the company is currently working on development of specific functionality for special purpose home security and automation usage, by using the smart home technology.

Forus Living Pte. Ltd., which is formerly known as Forus Alliances (S) LLP, has been established since 2005 by Terence Teo and Steven Chai. Both of them are from engineering background and with enthusiast in green technology especially technology that is related to home automation. Forus Living is the brand name carried by the company to promote green and healthy life style.
