ShapeHost Launches New Spring Sale Offering Savings Of Up To 35% On VPS Packages

ShapeHost offers the very latest in virtual private server hosting, and has now introduced a spring sale to help people save up to 35% on their best-selling offers.

Timisoara , Timis -- March 8, 2016 (FPRC) -- Virtual private servers are now increasingly becoming the norm for individuals who need a powerful mobile lifestyle with access to their files anywhere, on any device. Traditionally virtual private servers have only been available to high level executives or tech experts, but companies are now making them accessible to everyone. ShapeHost is leading the field with its scalable VPS packages, and has now introduced a Spring Sale with the opportunity to save up to 35% on some of their best offers.

The spring sale allows individuals to save $16 on their best-selling, three-month ShapeHost Windows VPS Rectangle SSD storage, offering a quad-core CPU and 8gb RAM supporting 100gb of storage, with unlimited usage and speeds of up to 1gb per second. Alternatively, individuals can try the package for a month for $31 instead of $37 on a rolling contract basis, with additional great deals on ShapeHost Linux VPS.

Not only can people save on their package pricing, but will also save against competitors thanks to the huge range of included extras at no additional cost, including 24/7 support and state of the art security measures. With packages starting from as little as one penny, there is a scalable solution for every need.

A spokesperson for ShapeHost explained, "ShapeHost is pleased to be able to introduce new and exciting money saving deals to individuals throughout the US and beyond. Our servers are the fastest, most reliable and most secure available anywhere, and now they come at even more attractive prices than ever before. The website currently enables individuals to receive the promotional codes for the moneysaving deals just by entering their email address or logging in with Facebook or Twitter. They will then get access to these great deals, and a second-to-none service that will make them wonder how they did without it."

About ShapeHost: ShapeHost offers servers that have high physical security and power redundancy, ensuring client data is secure. Their ultra modern servers and resources ensure VPS' will respond in a matter of milliseconds. The speed of these machines is their priority, and the company has a dedicated team of sales and support staff together with skilled technicians who keep the servers running optimally at all times.
