

## **Computer, E-waste and Electronic Recycling Company Chooses Orlando for its Headquarters**

### *Southeastern Data Opens New Electronic E-Recycling Center*

ORLANDO, Florida (May 2, 2016) – Leading Computer Recycling and IT Asset Management and company, Southeastern Data (SED) announced the opening of its newest location located at 6855 Presidents Drive, Suite 200, in Orlando, Florida. This new operation is expected to create local jobs and bring computer and electronics recycling and e-waste disposal from Longwood to the Orlando area.

#### Orlando Gets New Computer Recycling and E-Waste Company

“SED is proud to further strengthen the community of Orlando by creating green jobs and providing a safe, reliable outlet for businesses to recycle computers and other technological devices, as well as dispose of e-waste,” Michael Stubblebine, President of Southeastern Data said “There were many other locations we could have chosen for our headquarters but the city of Orlando stood out as the clear winner. Our goal is to provide Orlando’s businesses and community with a safe way to dispose of the growing amount of unwanted and unused computers and electronic devices.”

#### A Safe Way for Orlando Businesses and the Community to Dispose of Unwanted Computers and Electronics

SED offers its e-recycling service to businesses, educational institutions, retail and manufacturing facilities, and government organizations. The company also offers IT asset management, data security, and mobile hard drive shredding services. Plans include using this new location for its remarketing operations offering refurbished electronics and pre-owned computers for those who may be in the market.

#### More Information

“It is an exciting time for Southeastern Data,” said Stubblebine. “The new headquarters allows us to expand and offer even more of our services to the community of Orlando. That means a safe and beautiful future for all of us.”
