

Maxprog releases eMail Extractor 3.6.8 for macOS and MS Windows

eMail Extractor 3.6.8 has been released today and is available now on Maxprog website with several interesting new features and improvements.

September 20, 2016 (FPRC) -- Maxprog is proud to present a new release of eMail Extractor, available now on Maxprog website with several interesting new features and improvements.

eMail extractor is a very powerful and reliable tool to extract e-mail addresses from all kind of text sources like your local files, plain text drops and the clipboard. eMail Extractor can extract e-mail addresses from plain text (.txt) files, Adobe PDF (.pdf) files, MS Word (.doc and .docx) documents, MS Excel (.xls and .xlsx) sheets, HTML (.html, .htm, .php, ...) and RTF files.

eMail extractor is very fast, easy to use and multithread. It retrieves absolutely all valid e-mail addresses and generates an output file with only good and well formatted e-mail addresses without duplicates.

eMail Extractor is available in English, German, French, Spanish, Italian, Dutch and Russian for macOS 10.7 and MS Windows 7 (or higher).

eMail Extractor is an extremely easy-to-use and straightforward software. You just have to drop your file(s) directly over the eMail Extractor application icon or double-click eMail Extractor and drop your file(s) or folder(s) over the main window. eMail extractor retrieves absolutely all valid e-mail addresses and generates an output file with only good and well formatted e-mails without duplicates.
