

CertExams.com Revises CCENT™ Exam Simulator

CertExams.com, a leading netsim provider, updated Cisco® CCENT™ 100-105 exam simulator. The examsim consists of 300+ most relevant questions with flash cards.

October 20, 2016 (FPRC) -- CertExams.com, a leading network simulation software provider, released a major revision to their CCENT Exam Simulator, for candidates preparing for various Cisco certifications. The simulator mimics actual exam environment and prepares the candidates to face the actual exam with confidence.

The topics covered by recent CCENT cert and respective weightages are given below:

- 1.0 Networking Fundamentals 20%
- 2.0 LAN Switch Fundamentals 26%
- 3.0 Routing Fundamentals 25%
- 4.0 Infrastructure Services 15%
- 5.0 Infrastructure Maintenance 14%

Notable changes to the recent exam are inclusion of RIP, moving OSPF to ICND2, cloud services, and updates to MPLS, BGP, wireless controllers and others.

The important features available with the CCENT examsim include MCMA and MCSA questions, drag-n-drop questions, simlets (these are questions wherein you will be presented with a network simulation and asked a few questions), and testlets (here, you will be presented with a scenario, and a few questions are asked). Router simulation questions test a candidate's hands-on experience in configuring and troubleshooting real networks.

About CCENT (Short for Cisco Certified Entry Network Technician): The certification is offered by Cisco, and is an entry level cert. It is a good place to begin if you intend to make out a career in computer networking, or an enthusiast.

About CertExams.com

The website offers exam simulators and network simulators for Cisco CCNA, CCENT, CCNP, CompTIA practice tests, and others. The network simulators offered by CertExams.com include CCNA netsim with designer, Juniper netsim with designer. Switch simulator for JUNOS/IOS operating systems is also available.

About Anand Software and Training Private Limited: Founded in 2002, Anand Software and Training offers website development, exam simulators, and network simulation software for candidates preparing for IT certifications. The exam simulators offered include A+ Essentials, Network+ cert, CCNA, CCENT, and SCJP.
