

Outcome Of 2016 US Presidential Elections Will Cause Global Catastrophe

Americans are in the process of choosing their next President. One of two people will become leader of the free world - Hillary Clinton or Donald Trump. The wrong choice will have devastating consequences for our world.

Virend Singh and Verusha Singh, Australian best-selling authors of *The Inexplicable Laws of Success*, have released a free report detailing the catastrophic results of the 2016 presidential election. They believe that the election is not just a domestic concern, but one that drastically affects the rest of the world. The report titled, *Hillary Clinton: The Tragic Truth*, outlines three major global concerns that will conclude in devastating results if Hillary Clinton is not voted in as President. The Singhs' wrote the report in an effort to promote global unity and peace, which they feel is currently under threat.

The three major issue are as follows:

1. Climate Change: Of all the major conservative parties in the free world, the Republican Party stands alone in its denial of the legitimacy of climate science and believes that no national or international response to climate change is needed.

The reports say in reference to his twitter post, "Donald Trump actually thinks that climate change is a hoax cooked up by the Chinese "in order to make U.S. manufacturing non-competitive.""

2. Global Consciousness: The presidential candidate of choice will have an incredible impact on the mindset of people across the world. As such, "they should aspire to bring about global cohesion across all communities, as well as break barriers and build bridges between the diversity of cultures and groups regardless of faith."

3. A Role Model For Current and Future Generations: They talk about the qualities the leader of the free world should imbue,

"Presidential leadership is a serious responsibility that demands extraordinary leadership – experienced, stable, mentally-sound, reliable, predictable, consistent, dependable, unambiguous, decisive, clear-sighted, clear-thinking, focused, purposeful, influential leadership." and make it clear that these qualities are lacking in Trump.

They urge Americans to come out at vote, and also vote for the representatives they think can best effect the changes they want to see.

"Voter turnout is important. Apathy might result in unintended consequences... as was the case in Brexit. Millions who wanted the UK to remain a member of the EU did not vote only to learn that the "opposing camp" narrowly beat them at the polls. Their laziness to vote could cause unfavorable global consequences."
