

## **Thermalabs All-in-One Mini Airbrush Kit Now Available in the Market**

*Thermalabs brand new airbrushing kit is now available in the market.*

February 17, 2017 (FPRC) -- Thermalabs, a renowned cosmetics manufacturer, has said that its All-in-One airbrushing kit is now available in the market. This comes at a time when the company is looking to dominate the airbrushing system. Thermalabs last year launched a comprehensive set of airbrushing machines that could be used with spray tanning, body painting, tattooing, and many other applications.

Thermalabs is a global firm that has earned a reputation as a top producer of self-tanners and tanning accessories. The company has thus far furnished the market with at least two dozen tanning-related products. Among the most popular tanning products by Thermalabs include the Original Self Tanner, Tan Enhancer, Glow2Go, the Ultimitt tan applicator mitt, and the Premium exfoliating mitt.

Over the last 2-3 years, Thermalabs has expanded its operations to cover diverse market areas. The firm launched its Tent World arm that produces outdoor tents back in 2015. Thermalabs also owns another sub-company known as Supremasea, which manufactures skin care products, and Organic Healthcare. Thermalabs has manufactured dozens of beach-related accessories including beach chairs, beach beds, beach tents, beach t-shirts and more. In fact, the company has so focused on beach accessories that it's considering changing its slogan from 'self-tanning reloaded' to 'life's a beach'.

Thermalabs All-in-one mini airbrushing kit is also known as the Inagua airbrushing system. This is a pro machine that's designed with the needs of both the beginner and professional artist in mind. It replaces aged methods of applying makeups and facilitates a polished look whatever makeup combinations you're trying. According to Thermalabs, the Inagua system can also decorate cakes and even cars. It's designed to do just about anything a user would need to do with paint or makeup.

The company's users will now be able to access and purchase this machine on Amazon.com, as well as on Thermalabs official website – [www.thermalabs.com](http://www.thermalabs.com).

Alex Howard, marketing coordinator in charge at Thermalabs, said, "We are very glad today to announce that our Inagua airbrushing system is now available to users. The Inagua is an incredible system that will make it super easy for you to color your world. Whether you're looking to do some nail art, body painting, or just about anything else, our machine comes in handy. You can even decorate cakes and cars if you want. The system operates at the touch of a button and is super easy to use whether you're a beginner or pro artist. Thermalabs customers who are interested can now get this machine at an introductory price on Amazon.com."
