

## **Global Coronary Artery Bypass Graft Market is expected to grow at a CAGR of 6.4% by 2022**

*Global Coronary Artery Bypass Graft Market Information, by Type (off-pump, on-pump, minimally invasive direct CABG, endoscopic vein harvesting), by Procedure (single CABG surgery, double CABG surgery, triple CABG surgery, quadruple CABG surgery), by End User - Forecast Till 2022*

Global Coronary Artery Bypass Graft Market Information, by Type (off-pump, on-pump, minimally invasive direct CABG, endoscopic vein harvesting), by Procedure (single CABG surgery, double CABG surgery, triple CABG surgery, quadruple CABG surgery), by End User - Forecast Till 2022  
Pune, India - March 13, 2017 /MarketersMedia/ -- Market Highlights

Coronary artery bypass grafting (CABG) is a type of surgical procedure used for patients with coronary artery disease (CAD). It is used to improve quality of life and reduce cardiac-related mortality. CAD is the leading cause of mortality in the United States, Europe, and Australia. Additionally, it is the most common cause of heart failure. In the United States, CABG is the most common type of open heart surgery.

The Global coronary artery bypass graft market has been evaluated as a growing market and it is expected that the market will touch high growth figures in future. Factors such as increasing acceptance of advanced endoscopic procedures over the traditional ones and growing need for painless and effective procedures will help in driving the growth of the market. The global coronary artery bypass graft market is expected to grow with CAGR of 6.0% during the forecasted period.

### Major Key Players

- o Hancock Jaffe Laboratories, Inc.,
- o Terumo Cardiovascular Systems Corporation,
- o VasoPrep Surgical,
- o Dexter Surgical Inc.,
- o Neograft Inc.,
- o NOVADAQ Technologies Inc.,
- o MAQUET Holding B.V. & Co. KG.,
- o Genesee BioMedical,
- o Sorin Group, Edwards Lifesciences Corporation

There are different approaches to treat coronary artery disease such as traditional and CABG approaches. Nowadays, CABG techniques are more in use due to their minimally invasive nature and less pain associated with it. In traditional method there is a long surgical incisions down the thigh or on calf which causes more pain to the patient. On the other hand, the new CABG method has less complication coupled with less amount of pain associated with it and is for selected groups of patients with significant narrowing and blockages of the heart arteries.

The market for coronary artery bypass graft is growing steadily. The growing use of endoscopic vein harvesting and minimally invasive methods has fueled the growth of the global coronary artery bypass graft market. However apart from the factors leading to the growth of this market, there are some restraints hampering the market growth such as changing reimbursement policies and payment models and fluctuating prices of the products and services.

The market for coronary artery bypass graft is growing due to increasing prevalence of cardiovascular disease and increasing demand for specific surgery options for coronary bypass

surgery are some of the key factor providing a strong impulse to the market for this device. But the changing patterns of payments and reimbursements are hampering the growth of this market.

Test the market data and market information presented through more than 60 market data tables and figures spread more than 80 numbers of pages of the project report. Avail the in-depth table of content TOC & market synopsis on "Global Coronary Artery Bypass Graft Market from 2013 to 2022".
