

## **Conductive Polymers Market: Industry Analysis, Size, Share, Growth, Trend and Global Forecast to 2027**

*Global Conductive Polymers Market Information by types (Polyaniline, Polycarbonate, Inherently Conductive Polymers, Polyphenylene-based resins and others), & by applications (Batteries, Capacitors, ESD & EMI protection, solar cells, packaging and others) Forecast to 2027*

Global Conductive Polymers Market Information by types (Polyaniline, Polycarbonate, Inherently Conductive Polymers, Polyphenylene-based resins and others), & by applications (Batteries, Capacitors, ESD & EMI protection, solar cells, packaging and others) Forecast to 2027 Pune, India - March 14, 2017 /MarketMedia/ -- Market Highlights:

The Global Conductive Polymers Market has witnessed a positive growth over the recent past and is expected to continue to rise over the forecasted year. The increase in usage of light weight conductive compound, high performance and cost effective products have driven the global market for conductive polymers. Moreover, the conductive polymers' properties such as flexible, stable, chemical resistance and strength have accelerated the demand globally.

Conductive polymers are mostly used in the application areas such as batteries, capacitors, solar cells, packaging, ESD and EMI protection and among others. Moreover, huge demand from the application side has also become a major contributor to growth in the global market. ESD and EMI protection together are estimated to be the largest application markets.

However, high manufacturing, production and processing cost is expected to hinder the overall market growth. The technological advancements and R&D activities are estimated to open more opportunities for the current leading players in the Conductive Polymer Market.

Key Players of Conductive Polymers Market:

- o Heraeus,
- o Dow Chemical
- o Bayer
- o Lubrizol Corporation
- o Henkel Electronics
- o Crosslink
- o ITEK
- o Nano Markets
- o CBI Polymers
- o AnCatt

Segmentation:

The global conductive polymers market is segmented on the basis of types and applications. On the basis of type, the global market is segmented into Polyaniline, Polycarbonate, Inherently Conductive Polymers, Polyphenylene-based resins and others. On the basis of application, the global conductive polymers market is segmented into Batteries, Capacitors, ESD & EMI protection, solar cells, packaging and others.

Study Objectives of Conductive Polymers Market:

- o To provide detailed analysis of the market structure along with forecast for the next 10 years of the various segments and sub-segments of the global conductive polymers market.
- o To provide insights about factors affecting the market growth.

- o To analyse the global conductive polymers market based on various factors- price analysis, supply chain analysis, Porter's five force analysis etc.
- o To provide historic and forecast revenues of the market segments and sub-segments with respect to four main geographies and their countries- North America, Europe, Asia, and Rest of the World (ROW).
- o To provide country-level analysis of the market with respect to the current market size and future prospective.
- o To provide country-level analysis of the market for segment by product type and applications
- o To provide strategic profiling of the key players in the market, comprehensively analysing their core competencies, and drawing a competitive landscape for the market.
- o To track and analyse competitive developments such as joint ventures, strategic alliances, mergers and acquisitions, new product developments, and research and developments in the Global Conductive Polymers Market.

About Market Research Future:

At Market Research Future (MRFR), we enable our customers to unravel the complexity of various industries through our Cooked Research Report (CRR), Half-Cooked Research Reports (HCRR), Raw Research Reports (3R), Continuous-Feed Research (CFR), and Market Research & Consulting Services.

MRFR team have supreme objective to provide the optimum quality market research and intelligence services to our clients. Our market research studies by products, services, technologies, applications, end users, and market players for global, regional, and country level market segments, enable our clients to see more, know more, and do more, which help to answer all their most important questions.
