Jackson, United States - March 14, 2017 /PressCable/ --

Apex Electric LLC, an electrical company based in Jackson, Mississippi, launched LED lighting solutions for residential, commercial and industrial clients in Jackson, Madison, Clinton and the surrounding areas.

More information can be found at <http://apexelectricms.com>.

LED lighting has grown in popularity as an energy-efficient alternative to incandescent lightbulbs. A LED can last up to 25 times longer than an incandescent lightbulb (25,000 hours - or roughly 25 years - compared to just 1,000 hours, or 1 year). With 2014 federal laws stopping the manufacture of incandescent lightbulbs, LED seems to be the future of USA lighting solutions.

LEDs are considerably more energy-efficient than incandescent lightbulbs, helping home and business owners save between 25-80% on their energy bills. Since certain commercial buildings often use about a fifth of their electricity for lighting, such figures can have a significant impact on a company's finances.

Furthermore, LEDs resemble natural light more closely than incandescent lights, and many consider them easier on the eye when compared to other sources of artificial light.

Apex Electric LLC provides complete LED lighting services for residential, commercial and industrial clients. The company is an official partner of Neutex LED Lighting, providing high-quality LED lighting solutions.

The Jackson company provides comprehensive ROI and cost analysis, to help clients understand exactly how much they could be saving by switching to Neutex LEDs. The actual figures typically range between 20% to up to 80%, depending on the scale of the project, the size of the building and other factors.

Apex Electric works with professional technicians to design lighting systems in complete accordance with the client's needs and preferences. The company provides both indoor and outdoor LED lighting systems, offering versatile options for a wide range of lighting needs.

For industrial clients, the company provides low, mid and high bay LEDs, canopy and wall packs, street and flood LEDs and many others.
