Luke Maguire, a social media marketer and software developer, announced the launch of Instamate 2.0. The new Instagram management and automated marketing software allows users to schedule automated content posting, leverage viral content to grow their audiences, and easily manage their Instagram profiles.Wanchai,, Hong Kong - March 15, 2017 /PressCable/ --

Professional social media marketer and software developer Luke Maguire announced Instamate 2.0, an Instagram management and automated marketing software.

More information can be found at http://letsgolook.at/Instamate2.

Instagram is one of the fastest-growing social media platforms, with an impressive 2013 growth of 23%, almost a fifth more than Facebook, its parent company. This sharp growth has led many digital marketers, website owners and business people to create strategic marketing campaigns aimed at leveraging the immense potential offered by the popular content sharing platform.

Instamate 1.0 was one of the most successful social media management solutions of 2016, helping thousands of website and business owners grow their Instagram audiences and contribute to increased business reputation.

Instamate 2.0 was developed as a response to the many 2016 Instagram updates, including stories, videos, emojis, live feeds and more. The cloud-based software aims to help website and business owners manage their Instagram feeds more effectively, using viral content for improved social media visibility and superior market reach.

The new software has seen considerable improvements over the previous version, with many features being added in to better respond to the newest Instagram updates. Instamate 2.0 helps users create Instagram stories and schedule posting even when they are offline, thus helping them increase audience engagement and improve their marketing strategies.

Instamate 2.0 also includes complete Instagram account management solutions. All content and activities can thus be managed from the Instamate dashboard, without the user having to navigate between different browser tabs.

Finally, the new Instagram management and marketing software allows users to find the most successful online content and share it on their Instagram account in just one click. This helps leverage viral content to increase Instagram audience and, unlike other automated posting solutions, allows users to choose exactly what type of content they want to be associated with.
