Oakland Park, United States - March 15, 2017 /PressCable/ --

Bio Coatings, a Fort Lauderdale powder coating company, launched a wide range of services including professional sand blasting, different types of powder coating, metallizing and others.

More information can be found at <http://bio-coatings.com>.

Powder coating is a type of finish that has enjoyed growing popularity since its introduction in the 1960s. Tougher and more resistant than conventional paint, powder coating is also extremely versatile, in that it allows the creation of different color designs and intricate color blends.

Bio Coatings is a professional powder coating company based in Fort Lauderdale, Florida. The company specializes in comprehensive finishing services for a wide variety of surfaces and products.

The Fort Lauderdale company provides chemical stripping, sand blasting, powder coating and metallizing services to both residential and commercial clients. All interventions are performed using state-of-the-art technological equipment and licensed and certified professionals for increased safety and customer satisfaction.

Bio Coating strives to provide complete finishing and refinishing services, in an effort to help clients work with a single contractor for all their coating needs. Since hiring multiple experts for the different stages of the finishing process can be relatively expensive, Bio Coating helps clients obtain both faster and more affordable services.

The company ensures all necessary surface preparation procedures. Residual paint or pre-existing finishes can be removed either by sand blasting or by using chemical stripping. Sand blasting is effective for removing rust and can also be used for esthetic purposes. For lighter surfaces, the company provides professional chemical stripping to remove paint and other finishes.

All powder coating interventions are undertaken after careful consultation with the clients, to ensure that all their needs and preferences are well catered for. Bio Coating provides professional color matching and color blending services.

Bio Coating has years of experience working with a variety of clients, from marine and aviation to vehicle owners and local restaurants.
