

Leading Telecommunications Vendor - Accelerated Communications and Construction - Introduces New Website

Accelerated Communications and Construction LLC, a leading telecommunications vendor serving Florida and Alabama, has just announced the launch of their new website. The company specializes in cable installation, commercial low voltage projects, structured wiring, and underground utility construction for both residential and commercial projects.

Accelerated Communications and Construction LLC, a leading telecommunications vendor serving Florida and Alabama, has just announced the launch of their new website. The company specializes in cable installation, commercial low voltage projects, structured wiring, and underground utility construction for both residential and commercial projects. Gulf Breeze, United States - March 15, 2017 /MarketersMedia/ -- Accelerated Communications and Construction is pleased to announce that their new, remodeled website is now up and running. Popularly known as ACC, the company is one of the most preferred telecom vendors across Florida and Alabama. A licensed Underground and Low Voltage Contractor, ACC offers specialized service in cable installation, commercial low voltage projects, structured wiring, underground utility construction and much more. The new website of Accelerated Communications and Construction is a part of the company's online marketing strategy.

In today's rapidly changing business landscape, corporate websites function as an extension of the business and needs to demonstrate the brand effectively. The redesigned website of ACC is informative, engaging, and contains relevant information for their current and prospective clients. Visitors to the website will now have easy access to detailed discussions on the company's extensive range of service. With just a single click, they will also be able to connect to the company via Facebook, Twitter and LinkedIn.

Over the years, Accelerated Communications and Construction has developed key business relationships with renowned Multiple System Operators such as COX Communications, Mediacom, and AT&T by serving them with great distinction. Their comprehensive range of services include:

- o Underground: Installation and replacement of a wide array of utilities with the help of advanced tools.
- o Directional Boring: Environment friendly techniques to bore paths for utilities, including cable, Fiber-optic, water, and other lines.
- o Installations: Cable, Internet, and Phone, low voltage wiring, custom rewiring, MDU installations, drop buries, and FTTH.
- o Commercial: Commercial installations, CAT 5 and 6 Pulls and Terminations, WiFi Systems, Fiber-optic to Business, WiFi in MDU, etc.
- o Plant Maintenance and Construction: Surveys and Permitting, Power Supplies Placement/Removal and Upgrades, Sweeping and Balance, Stranding, Coax Cabling, and more.
- o Audit and Sales: Collections, Trap/Tap Audits, and Disconnects.

Highlighting the benefits of the company's new website, a senior spokesperson from Accelerated Communications and Construction said, "Our new website has been designed to make the lives of our website visitors easier. This website will not only provide a deeper insight to our service offerings, but also make it a breeze for the visitors to communicate effectively with us."
