

Avandel Announces General Availability Of Inspect This! Via The Sage Marketplace, A Leading Accounting Solutions Marketplace

Avandel's Inspect This! enables field service customers to leverage a fully integrated Salesforce-powered accounting solution.

Avandel's Inspect This! enables field service customers to leverage a fully integrated Salesforce-powered accounting solution. Irvine, USA - March 15, 2017 /MarketersMedia/ -- Avandel Inc. today announced the general availability release of its field service application Inspect This! available via the Sage Marketplace. This solution empowers commercial field service businesses to have a full life cycle solution on a single platform. The integrated Inspect This! and Sage Live solution is ideal for organizations looking to run their entire business in a single cloud based environment.

Built on the Salesforce App Cloud, Inspect This! and Sage Live are both currently available on the AppExchange. Combined together in a single suite, they offer commercial field service organizations who conduct inspections, work orders, and field jobs to automatically invoice for their services.

The combined cloud app suite is designed to simplify the process of operating a field service business with billing for services related to inspections and work orders. Inspect This! offers a flexible field service billing model with support for fixed price, time based, location based, parts used, recurring and one time job models. Once the work is complete, Inspect This! sends the invoice to the Sage Live accounting system, eliminating the need for complex integrations with 3rd party accounting systems.

The Inspect This! application has been designed to extend Salesforce to offline inspections life cycle management. With the integration into Sage Live, a field service customer can now use a single enterprise scale platform to run their entire business, from engineering operations to accounting" said founder of Avandel, Met Ergun.

"Companies are looking to transform the way they connect with customers, partners and employees to thrive in the age of the customer," said Kori O'Brien, SVP, App Innovation Partner Sales, Salesforce. "By leveraging the power of the Salesforce App Cloud, the Avandel and Sage Live combined solution provides customers with an exciting new way to utilize mobile devices for connecting real time information about field assets to the people that need it."

KEY BENEFITS AND AUDIENCES

The combined Inspect This! and Sage Live solution works natively on Android and iOS / Apple mobile-device operating systems to maximize performance, flexibility and functionality. Collected inspections data and work order information is stored locally offline on the mobile operating system and syncs securely in the background with configurable Inspect This! / Sage Live app, available on the AppExchange.

Some of the key targeted vertical markets for the combined solution include commercial organizations operating in:

- * Environment, Health and Safety Inspections
- * Construction Site Inspections
- * Property Management Inspections
- * Fleet and Asset Management
- * Field Service Work Order Tracking
- * Factory Acceptance Testing, Certification
- * Field Performance Monitoring, Quality Control
