Global Integrated Building Management Systems Market, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the market landscape and its growth prospects over the coming years. March 15, 2017 /MarketersMedia/ -- The global IBMS market is expected to record a high growth during the forecast period. Many buildings are expected to opt for integration of their BAS. Integrated systems aid facility managers and building personnel to effectively monitor and regulate operations using a single controller as opposed to individual and distinct controllers for automation solutions. Building automation and control systems are normally installed in residential, commercial, and public buildings to operate, control, and monitor mechanical, electrical, and plumbing (MEP) systems, lighting controls, and safety and security systems. Publisher's analysts forecast the global integrated building management systems market to grow at a CAGR of 12.48% during the period 2017-2021.
