

Thermalabs to Offer Free Tanning Guide with Its Tanning Products

Thermalabs will ship a new in-depth guide with all its tanning-focused products.

March 15, 2017 (FPRC) -- Cosmetics bigwig Thermalabs has today said it will include a brand-new, in-depth tanning guide with each shipment of its tanning products. This move, the company hopes, will educate consumers and help them make the best out of its tanners, as well as those from other brands. Thermalabs has said that the new guide is packed with useful information related to general skin care, choosing a tanner, and taking care of the skin before and after tanning.

Thermalabs is a major US-based cosmetics firm based in New York City. Although Thermalabs manufactures a variety of products in a number of industries, the company is most popularly known for its top quality tanners. Thermalabs has furnished the tanning space with at least two dozen different products. Among other things, the company has supplied tanning buffs with 100% organic tanning formulations but are safe and deliver results within a short time. The company has also produced accessories that make tanning easier. A few of the best-known products by the company include the Ultimitt tanning mitt, the Original Self Tanner, and Tan Enhancer. The Original Self Tanner is the company's pilot launch and contributed a great deal to its success later. Based on top-notch ingredients such as Aloe Vera, Green Tea and Olive Oil, the company's original self-tanner delivered a beautiful tan within just 4 hours. This was significant considered that the competition's products took up to 6 hours before results could be seen. The Ultimitt is an applicator mitt for tanners, lotions, and sunscreen that has been a perennial bestseller on major online retail marketplaces.

With the new guide, Thermalabs hopes to make a contribution towards educating consumers. The company has said that the guide was created and polished up by industry-leading skincare experts who understand how tanners and various other cosmetics products work. By outlining elaborate tips and procedures that users can follow to better care for their skin, the company is hoping to see better utilization of its products. Among other products, this free guide will be included with every shipment of the Original Self Tanner, the Bonus Size Tanner, and the Travel Sized Tanner. People who do not wish to acquire any tanner from Thermalabs can also request the guide from Thermalabs official website – www.thermalabs.com.

"Moving forward, Thermalabs will be shipping a free in-depth tanning guide with all of its tanning-related products. The purpose of this guide is to educate consumers and show users how to they can make the best use out of available tanning methods and products. It's a small but valuable contribution to boosting the available information in the market. And since this guide was crafted by top skin care experts working at our research centers, consumers can count on it to be valuable and insightful. Stay tuned to Thermalabs for more," said Alex Howard, a marketing coordinator at Thermalabs.
