Getting a pizza that is not pre-cut can turn into a messy and wasteful process. If the knife is even slightly blunt, a lot of the cheese and topping will slide off the crust. If the blade is not long enough, the handle will get in the way of a neat and precise cut.

The rocker blade pizza cutter is 13.75 inches long and 3.5 inches tall. This enables it to effortlessly slice through the biggest pizza and pizzas with both thin and extremely thick crusts. There will be no need to saw back and forth to get multiple slices cut together.

The stainless steel blade allows for restaurant-quality neat slices to be cut. It can be washed in the dishwasher and is durable and does not rust. The cutter blade comes with its own protective cover. The cover is easy to replace and also can be easily removed and put back on. The cover ensures that the blade need not be stored in any inaccessible place but can be safely kept along with the other utensils.

Providing greater value for money, the versatile knife can be used for other food-related cutting purposes. It can be used to cut bread, cakes, pies and the sharp blade even works well with fruit and vegetables.

The pizza cutter knife is made with such dedication to quality that it comes with a lifetime guarantee against manufacturing defects. It will be a good replacement for a host of cutting equipment in the kitchen. For more information or to place an order, visit the link given above.
