Rachel Rofe, a professional digital marketer and software developer, announced Low Hanging System, an ecommerce solution allowing the creation and selling of custom-printed merchandise. Wanchai, Hong Kong - March 16, 2017 /PressCable/ --

Professional digital marketer Rachel Rofe announced the launch of an ecommerce design solution called Low Hanging System. The system allows the creation and selling of printable designs for a variety of products such as t-shirts, mugs, necklaces and others.

More information is available at <http://letsgolook.at/LowHangingSystem>.

Online shopping has grown considerably over the past decade, as more and more people have come to appreciate the benefits of shopping from the comfort of their homes. The variety of products currently available makes online shopping a solid alternative to traditional shopping, with easy-to-browse categories, secure transactions and versatile refund policies.

This popularity has led many business owners to focus their efforts on creating customized merchandise, one of the most sought-after types of ecommerce products. Mugs, t-shirts, hoodies, necklaces and other products can be customized to create personalized gifts, with many shops offering a wide selection of such merchandise.

Low Hanging System is a new solution allowing the creation of attractive designs for custom merchandise. The product aims to help ecommerce sellers to easily create effective print designs with custom messages, logos and other features.

The system provides the users with the SpotWins Research Tool, allowing them to find best-selling custom designs on Amazon, eBay and other websites. The users can then use these designs as ideas for their own products.

Low Hanging System also includes a tool that can be used to easily create custom designs for personalized merchandise. Users can use free pictures to design printer logos and messages which can then be applied to a variety of products.

Finally, the system provides a mug launching software to facilitate the promotion of custom products on a variety of networks such as Amazon, eBay, Etsy and others.

Clients will also get a number of bonuses such as Amazon integration, free ecommerce credits and more.
