

Dynamic® Sports Development LLC introduces the first OTC true Orthotic Performance Insole via our Kickstarter Campaign.

Question- Do you suffer from foot pain, arch pain, Plantar fasciitis, or even Diabetic Neuropathy? Answer- Dynamic® Performance Insoles!

March 16, 2017 (FPRC) -- Dynamic® Sports Development LLC, Las Vegas Nevada USA.

Dynamic® Sports Development LLC introduces the first over-the-counter Orthotic performance insole built to provide cushion and energy return, and relief from Arch Pain, Foot pain, Plantar Fasciitis, and even relief from Diabetic Neuropathy. (See our campaign at Kickstarter!)

Dynamic® Performance Insole are biomechanically engineered with a patent pending Carbon Fiber Reinforced Flex-Arch® support system allowing your arch to be supported and naturally flex at the same time. These performance insoles also feature Coolmax® top lining, AGion® anti-Microbial silver nitrate infusion, full PU and dual density impact point PORON® shock pad cushioning. Finally, Dynamic® Performance insoles feature a fully injected and carbon fiber lined Flex-Arch/heel cup for gait control/alignment.

These insoles outperform all other insoles on the market today, and not only relieve foot and arch pain, but help in the prevention of injuries associated with unprotected shocks and impacts traveling from your foot, to the ankle, to the knee, to the hip, and into the lower back.

- FLEX-ARCH™ Technology- Positive flexible arch support, reinforced with carbon fiber mesh.
- Full length cushion using high grade PU materials, pinpoint dual density PORON™ cushioning and impact energy return.
- Full injected arch/heel unit providing Gait and Motion control at every step.
- Coolmax™ for cooling, AGion™ anti-odor/anti-microbial silver/copper/ zinc treatment
- All of the above performance features create and maintain an "In Balance" system for you, your children, and your bodies- the "Machines".
- ALL of these benefits in an insole that is at a price-point that is at or below the competitors' less technical products!

Our challenge is to be able to show the consumers that Dynamic® Insoles are by far the better choice for performance, for pain relief, and for injury prevention. These insoles are great for walking, hiking, running, training, sports etc.

How good are they? We had the FDA (Food and Drug Administration) do a review of these insoles straight out of the box. Their response was that the preliminary review shows that the Dynamic Insole would qualify as a Medical Device- right out of the box, over-the-counter! Few if any others can make that claim.
