

Affordably Upgrade Home Wireless with Tenda's AC6 Dual-Band Router

(March 20, 2017) City of Industry, CA, USA -- Tenda Technology Inc., a subsidiary of Shenzhen Tenda, introduces the AC6 smart router: its most affordable dual-band AC1200 router yet. The AC6 is the perfect network upgrade for families with aging Wi-Fi, seeking to increase speeds or solve gaming latency and streaming delays. Beamforming+ and High-Gain Antennas Eliminate Deadzones The fifth-generation 802.11ac standard includes advanced beamforming technology. The AC6 tailors its signal to each individual connection according to the end device's spatial location. By optimizing signals on the fly, the AC6 maintains better and more consistent connections compared to other routers. It uses four amplified high-gain antennas to ensure users always have reception, even in large multi-story homes. Dual-Band Advantages with Better Broadcom Internals In spite of its affordable price tag, at the heart of Tenda's AC6 is the same high-end ARM chip found in more costly top-tier routers for exceptional stability and wireless performance. The AC6 has a maximum throughput of 1167Mbps, concurrently broadcasting both 300Mbps on the 2.4Ghz band and 867Mbps on the 5Ghz band. The 5Ghz signal offers the highest speeds, while the 2.4Ghz signal has greater wall-penetration and overall range: combined together, the dual-band AC6 provides the best of both worlds. Easy Setup, Convenient App Controls, and On-The-Go Remote Management Tenda's control interface is well praised by networking reviewers for its clean, organized design and ease of use. Setting up the AC6 is a breeze, and users can opt to install Tenda's smartphone app for even more convenient controls on the fly. The AC6 even makes it possible to adjust router settings remotely away from home. Set a Wi-Fi schedule, set a sleep timer, configure a home VPN server, enable parental controls - there are countless useful tools to customize the perfect home networking solution. Price and Availability The AC6 is available at Tenda's US Online Shop for \$34.99 More information is available on the AC6 official site. About Tenda Technology Inc. 12043: Headquartered in City of Industry, California, Tenda Technology Inc. is a subsidiary of Shenzhen Tenda, a specialist in designing, developing and manufacturing networking devices and equipment. Since September 2013, Tenda USA has provided logistics, supply and support for all Tenda WiFi equipment and networking solutions. Tenda provides wireless AC routers, range extenders, access points, powerline adapters, IP cameras and home switches. Business IP and WiFi solutions include wireless wall, ceiling and outdoor AP plates; access controllers; PoE, managed, unmanaged switches and PoE injectors; and HD IP cameras. Sold at all big online retailers, Tenda provides technical support at 1-800-570-5892 (Mon-Fri, 9 am - 6 pm PST), or at support@tenda.com.cn.
