Reza Nabavian MD FACS, a board certified plastic surgeon announced the continued availability of liposuction available at his plastic surgery clinic in Santa Monica California.

Reza Nabavian MD FACS, a board certified plastic surgeon announced the continued availability of liposuction available at his plastic surgery clinic in Santa Monica California. Santa Monica, United States - April 14, 2017 /PressCable/ --

Customers looking for exceptional body sculpting options for contouring are now able to schedule a consultation for liposuction by Reza Nabavian MD FACS. Reza Nabavian MD FACS, Owner at Reza Nabavian MD FACS has just released more in depth details of Liposuction's development.

Liposuction is designed to appeal specifically to normal-weight people with firm, elastic skin who have pockets of excess fat in certain areas. It is a plastic surgery procedure that can help sculpt the body by removing unwanted fat from specific areas, including the abdomen, hips, buttocks, thighs, knees, upper arms, chin, cheeks and neck - This was made part of the product, since "lipoplasty" or "suction lipectomy," has benefited from several new refinements. Customers who opt for Liposuction should enjoy this particular feature because a number of new techniques, including ultrasound-assisted lipoplasty (UAL), the tumescent technique, and the super-wet technique, are helping many plastic surgeons to provide selected patients with more precise results and quicker recovery times. For more details visit <http://www.nabavian.com/liposuction.htm>

Reza Nabavian MD FACS emphasises liposuction can remove stubborn areas of fat that don't respond to traditional weight-loss methods. Customers will likely appreciate this because Although no type of liposuction is a substitute for dieting and exercise it does remove areas of fat.

Patient financing is also an option - this feature was included because its not just for the rich and famous anymore.

Reza Nabavian MD FACS, when asked about Liposuction said:

"Individuals considering liposuction often feel a bit overwhelmed by the number of options and techniques being promoted today. I believe that plastic surgery must be performed in a safe and conservative manner with the highest level of attention to detail and service. As the demand for cosmetic procedures increases, physicians have an increased responsibility to provide their patients with honest and accurate information about different options and to emphasize patient safety and natural results. It is the responsibility of the patients to adequately investigate doctor's credentials and qualifications and to be critical of procedures that make unrealistic promises. I recognize the importance of technology and offer my patients the state of the art in non-surgical rejuvenation. However, I am careful about my choice of products and not easily impressed by the latest "fad"."

Dr. Nabavian is a Board-Certified Plastic Surgeon with expertise in cosmetic surgery of the face, the breast and the body. He is the Director of Aesthetic Surgery Education at USC where he serves as Clinical Assistant Professor of Plastic Surgery. In this capacity, Dr. Nabavian teaches young plastic surgeons how to perform safe, effective and ethical cosmetic plastic surgery. He is also a member of the Scientific Committee of the California Society of Plastic Surgeons where he serves as panelist and moderator for the annual meetings.
