WiseGuyReports.Com Publish a New Market Research Report On - "HVAC 2017 Global Market Expected to Grow at CAGR 5.24% and Forecast to 2022".Pune, India - April 14, 2017 /MarketersMedia/ -- The analysts forecast the global HVAC market to grow at a CAGR of 5.24% during the period 2017-2021.

HVAC systems are used to ventilate and filter the air in residential and non-residential spaces to maintain thermal balance. Various components used in these systems are heat exchangers, pumps, and fans. These systems control and regulate the temperature and humidity levels. The type of HVAC system required is determined by the indoor and outdoor air quality. One of the key factors that is driving the demand for HVAC systems is the rapid growth of the construction sector and real estate markets worldwide. Most of the newly constructed, modern buildings have been employing energy-efficient HVAC systems. In addition, urbanization and industrialization have been on the rise in developing countries. This has resulted in an increase in the number of factories, manufacturing units, commercial buildings, and residential complexes that have been using HVAC systems.
