WiseGuyReports.Com Publish a New Market Research Report On - "Commercial Countertop Fryers 2017 Global Market Expected to Grow at CAGR 5.24% and Forecast to 2022".Pune, India - April 14, 2017 /MarketersMedia/ -- The analysts forecast the global commercial countertop fryers market to grow at a CAGR of 5.24% during the period 2017-2021.

Commercial countertop fryers mainly come in two basic versions: electric fryers and gas fryers. These fryers are used to fry foods like potato chips, onion rings, fish, chicken, and shrimps. The frying time and oil temperature largely depend on the food type and size of the fryer. The electric countertop fryers are mainly used by small restaurants, food trucks, and concession stands. These fryers come with many specifications depending on the output requirements, which are categorized as light-duty, medium-duty, and heavy-duty. The heavy-duty electric countertop fryers are designed to handle constant, high output, while the light-duty and medium-duty models are designed for low-volume outputs and cannot be used constantly. These fryers also come with different oil capacities in the 5 lbs.-40 lbs. range and only 1-2 fry pots.
