Dr. William Portuese, a Seattle professional plastic surgeon available at +1-206-624-6200, announced a full range of updated services including facelift, eyelid surgery, chin lift, rhinoplasty and others. Seattle, United States - April 15, 2017 /PressCable/ --

Dr. William Portuese, a Seattle professional plastic surgeon, launched a wide range of updated services, including rhinoplasty, facelift, eyelid surgery, chin lift and many others.

More information can be found at <https://seattlefacial.com>.

Recent decades have seen considerable developments in reconstructive medicine and plastic surgery, making such services safer and more effective. The result has been an increase in the popularity of cosmetic surgery, with many opting for different procedures to improve their appearance.

This growth in popularity has also seen the appearance of a variety of clinics offering promotional discounts on what ultimately prove to be unreliable, dubious services. The effects of such practices can be severe, ranging from partial scarring to devastating mutilation, and often require further financial costs to remedy the damages. To avoid such situations, prospective patients are advised to seek only professional and certified plastic surgery services.

Dr. William Portuese is a professional, licensed and certified plastic surgeon specializing in facial surgery. Dr. Portuese provides Seattle clients with a complete range of facial plastic surgery services, including facelift, rhinoplasty, eyelid surgery, chin and cheek implants and many others.

The Seattle doctor provides professional rhinoplasty services for patients aged 16 through 80. Dr. Portuese uses a technique called closed rhinoplasty to eliminate visible scarring, since all incisions are performed on the inside of the nose. Non-surgical rhinoplasty services are also available.

Dr. Portuese also provides full facelift services. Typical facelifts are performed on patients aged 55 to 65, but it is not uncommon for older patients to seek such services as well. Dr. Portuese provides facelifts as stand-alone procedures or in conjunction with rhinoplasty or blepharoplasty (eyelid surgery).

Other services include eyelid surgery, neck lift, chin and cheek implants, as well as a variety of breast and body procedures.

Interested parties can find more information on Dr. Portuese and access a large before-and-after photo gallery by visiting the above-mentioned website.
