Workload management segment is expected to be the most promising service type during the forecast period

The implementation of workload management among businesses is expected to have the highest CAGR during the forecast period. The migration of workloads seems challenging for organizations, and the brokers help in eliminating the challenge. CSBs determine the best cloud service for a workload after taking into consideration certain parameters, such as regulatory compliance, location, technical compatibility, performance requirements, and cost.

The external brokerage enablement platform is projected to dominate the CSB market during the forecast period

The external brokerage enablement of the CSB market is projected to have the highest CAGR during the forecast period. The external brokerage enablement platform enables service providers, IT & telecom providers, System Integrators (SIs), and others to position themselves as cloud service brokers by operating their private cloud marketplaces. The technology vendors and SIs are also empowered to provide their value-added services on top of core cloud offerings through external brokerage enablement platforms. The external brokerage enablement segment is expected to grow in the coming years due to the number of business benefits and opportunities that it offers to various technology and service providers.

APAC is projected to witness the highest growth and North America is expected to have the largest market share during the forecast period

Asia-Pacific (APAC) is expected to grow at the highest CAGR during the forecast period. The growth in the APAC region is mainly driven by increasing internet & Die increasing internet and establishments of new data centers in China, India, Singapore, and Australia. These factors would ultimately drive the CSB market as well as lead to rise in value-added services. North America is estimated to hold the largest market share and dominate the CSB market in 2016. The service type segment is expected to see a major growth in the North American region due to increased cloud
