Complete report on Rubber Gloves industry spread across 78 pages with providing 4 company profiles with 7 tables and 40 charts is now available at <http://www.marketreportsonline.com/583601.html>.

Rubber gloves can be divided into several product categories on the basis of the material used for making them, each having their own advantages & disadvantages. Rubber glove manufacturers worldwide have been adopting a strategy of aggressive expansion to lower down their cost of production & maintain price competitiveness. This could lead to a possible supply glut in the future, which would further normalize with increased demand.

Growth of the global rubber gloves market is likely to be driven by factors such as up-gradation of manufacturing efficiencies, increased penetration of rubber gloves in emerging economies, emergence of new threats and escalating ageing population. The market is majorly trending with shift in consumer preference towards nitrile gloves, which are thin and as comfortable as traditional latex gloves. Along with this trend, other major development that could be seen in the market includes, improving bargaining power of the consumers and increased capacity expansion & product differentiation.

The report offers an in-depth analysis of the global rubber gloves market with focus on Malaysian rubber gloves market. The report profiles Top Glove Corporation, Kossan Rubber Industries, Hartalega, and Supermax Corporation.
