

## **Internet of Things (IoT) Testing Market Expected to Grow at CAGR 33% During 2016 to 2022**

*Internet of Things (IoT) Testing Market, by Solution & Services (Network Intelligence Solutions), Deployment (Cloud, On-Premise), Organization Size (Enterprise, SME Business) and End-User (CSP, BFSI) - Forecast 2022*

Internet of Things (IoT) Testing Market, by Solution & Services (Network Intelligence Solutions), Deployment (Cloud, On-Premise), Organization Size (Enterprise, SME Business) and End-User (CSP, BFSI) - Forecast 2022 Pune, India - April 17, 2017 /MarketResearchFuture/ -- Market Overview:

In this rapidly changing and technologically developing environment, internet of things is ever increasing. The market trend towards the Internet of things (IoT) is driving the Internet of things (IoT) testing market. The study indicates that due to rapid increase in internet of things it is becoming increasingly fragmented which as a result increases the need for internet of things testing.

The study indicates that internet of things (IoT) testing provide an integrated approach to validate the functional and non-functional requirements of IoT solutions which helps in future proofing of business using performance testing. This results in the increase of Internet of Things (IoT) testing Market. The internet of things (IoT) testing has few challenges to overcome. The challenges include dynamic environment, real-time complexity, scalability of system, safety concerns, privacy issues, hardware quality, network availability, complex use cases and others.

The recent industry news says that Frost & Sullivan has recently recognized Key sight technologies with the 2016 Global Frost & Sullivan Company of the year award based on its recent analysis of test and measurement (T&M) industry for internet of things. (IoT).

The Internet of things (IoT) testing Market is growing rapidly over 33% of CAGR and is expected to reach at USD 1708 million by the end of forecast period.

Key Players:

The prominent Players in the Internet of Things (IoT) Testing Market are- Cognizant (U.S.), Keysight technologies, (U.S.), Infosys (India), HCL Technologies (India), Capgemini (France), TCS (India), Happiest Minds Technologies (India), AFour Technologies (U.S.), SmartBear Software (U.S.), Rapid Value Solutions (U.S.), and Rapid7 (U.S.) among others.

Internet of things (IoT) testing Market Segmentation

The Internet of Things (IoT) Testing Market has been segmented on the basis of testing type, testing tools and applications. Looking through the testing type segment it's been observed that network connectivity testing is expected to dominate the Internet of things (IoT) testing market by the forecast period. The network testing focuses on testing of uplink and downlink speed of a network and responsiveness of the network connecting IoT application. The Internet of things (IoT) testing market would be dominated by Smart appliances application by the forecast period.

Access the market data and market information presented through more than 25 market data tables and 25 figures spread over 100 numbers of pages of the project report "Internet of Things (IoT) Testing Market - Forecast to 2022"

Market Research Analysis:

Regional analysis for Internet of things (IoT) testing market is studied in different geographic regions as Americas, Europe, Asia-Pacific and Rest of world. It has been observed that North America region would account for larger share in Internet of things (IoT) testing market. It has been observed that North America region has high adoption of internet of things and higher technology

developments which has resulted in the growth of Internet of things (IoT) testing market. The study reveals that Asia-Pacific region is expected to have a significant growth in Internet of things (IoT) testing market by the forecast period. The growing internet of things penetration has increased investments in innovation by Asia-Pacific region is expected to give a boost to Internet of things (IoT) testing market in this region.

Intended Audience

- o Technology investors
- o Key market innovators
- o Hardware vendors
- o Regulatory agencies
- o IoT testing providers
- o IoT service providers
- o Communication service providers
- o Quality assurance providers
- o IoT platform providers
- o Third-party system integrators
- o Application providers
- o Research/Consultancy firms

About Market Research Future:

At Market Research Future (MRFR), we enable our customers to unravel the complexity of various industries through our Cooked Research Report (CRR), Half-Cooked Research Reports (HCRR), Raw Research Reports (3R), Continuous-Feed Research (CFR), and Market Research & Consulting Services.

MRFR team have supreme objective to provide the optimum quality market research and intelligence services to our clients. Our market research studies by products, services, technologies, applications, end users, and market players for global, regional, and country level market segments, enable our clients to see more, know more, and do more, which help to answer all their most important questions.

In order to stay updated with technology and work process of the industry, MRFR often plans & conducts meet with the industry experts and industrial visits for its research analyst members.
