

Global Facial Injectable Market Expected to Grow at CAGR 13.2% During 2016 to 2021

Global Facial Injectable Market Analysis by Types (Botulinum Toxin, Hyaluronic Acid, polymers & Particles, and Collagen) and Application (Facial Line Correction Treatment, Face-Lift, Lip Treatments) - Forecast to 2021

Global Facial Injectable Market Analysis by Types (Botulinum Toxin, Hyaluronic Acid, polymers & Particles, and Collagen) and Application (Facial Line Correction Treatment, Face-Lift, Lip Treatments) - Forecast to 2021 Pune, India - April 17, 2017 /MarketMedia/ -- Market Overviews:

Global Facial Injectable Market has been evaluated as promptly growing market in the coming future and it is expected that the market will have high demand globally. The global facial injectable market is undergoing a rapid change. The global facial injectable market is growing due to worldwide growing demand for beauty treatments and other anti-ageing related cosmetic procedures is accelerating the growth of Facial Injectable Market. Growing demand to look young and visible positive effects of these treatments is increasing popularity of aesthetic procedures in population all across the globe. Further Technological Advancements is one of the main factor which is supporting the growth of the facial injectable market. Moreover the twenty first century is witnessing new developments in the industry of life science every day in various aspects.

New technologies offers wide array of products to treat number of different cosmetic surgeries. The expanding use of soft tissue fillers in aesthetic medicine is supporting the market growth. Soft tissue fillers are now the second most commonly performed minimally-invasive procedure behind botulinum toxin injections. According to the American Society of Plastic Surgery (ASPS), approximately 2 million procedures were performed using soft tissue fillers in 2012. Procedures using HA soft tissue fillers are predicted to increase in near future with a lucrative growth rate. Drivers for this growth include greater awareness and acceptance of aesthetic medicine, improved accessibility to practitioners in the field, an ageing population, and the opportunity for individuals to increase their general wellbeing.

Further as the facial injectable market has grown in popularity, the black market for facial injectables is also gaining awareness globally. As per a survey conducted it was found out that Asia is accounted for the largest facial injectable black market where in many illegal drugs are entering into the market which is resulting in many side effects. As a result of this side effects the patients are thinking twice about receiving facial injectable surgeries, thus restraining the growth of this market
