

Carbon Fi Launches Kickstarter Campaign For Carbon Fiber Ring

Carbon Fi Brings On Funded Today To Attract More Backers

Carbon Fi Brings On Funded Today To Attract More Backers Mesa, AZ, United States - April 17, 2017 /FundedToday/ -- Carbon Fi has launched a Kickstarter campaign for their unique carbon fiber Apex ring with glow resins. The company has partnered with Funded Today to bring more attention to the campaign and increase funds raised.

About The Rings

The Apex ring is made from Blackwood Carbon Fiber with thin glow-in-the-dark racing stripes. Blackwood carbon fiber utilizes a unique cross-cut pattern that mimics the appearance of natural wood grain across the surface of the ring. The glow resins within the ring only need to be exposed to UV rays or sunlight for a few moments a day to be fully charged to glow all night. The Apex ring comes in a thicker style known as the barrel, or a thinner more traditional-style ring.

Pricing and Availability

The Apex ring is available to back now on Kickstarter. With the help of Funded Today, Carbon Fi hopes to reach its funding goal by the beginning of May 2017. Once the project is complete, the rings are set to be produced and shipped to all backers worldwide by July 2017. The starting price for one ring is \$74.
