

## **Artificial Intelligence in IoT Security and Fraud Prevention Market Analysis, Size, Trends and Forecast 2022 by Target Audience**

*OrbisResearch.com has published new research report on "Artificial Intelligence in IoT Security and Fraud Prevention 2017-2022" to its database.*

OrbisResearch.com has published new research report on "Artificial Intelligence in IoT Security and Fraud Prevention 2017-2022" to its database. Dallas, United States - April 18, 2017 /MarketersMedia/ -- Artificial Intelligence (AI) is rapidly becoming integrated into many aspects of communication, applications, content, and commerce. The Internet of Things (IoT) is a particularly important area for AI as a means for safeguarding assets, reducing fraud, and supporting analytics and automated decision making. One of the major concerns is illegal capture and trade of IoT data which includes users' activities and records such as personal health, financial information, location, and asset information such as personal vehicles.

This report evaluates that technologies, market opportunities, and outlook for AI-based security in IoT. The report includes analysis of AI in specific IoT deployment scenarios such as Fog Computing architectures. The report provides forecasting for 2017 to 2022. All purchases of Mind Commerce reports includes time with an expert analyst who will help you link key findings in the report to the business issues you're addressing. This needs to be used within three months of purchasing the report.

Target Audience:

AI companies

Security companies

Wireless device manufacturers

Telephony infrastructure providers

Computer and semiconductor companies

Embedded hardware, software and OS providers

Wireless network operators and service providers

Major Points From Table Of Contents:

1 Introduction

1.1.1 Scope of Study

1.1.2 Target Audience

1.1.3 Companies in Report

2 Executive Summary

3 Overview

3.1 Cyber Security

3.2 Ramification of Cyber Security Threats

3.3 Internet of Things

3.4 General IoT Security Concerns

3.5 IoT Security Focus Areas

3.6 Distributed IoT: Fog Computing

3.6.1 Edge Computing

3.6.2 Edge Computing vs. Cluster Computing

3.6.3 Mobile Edge Computing

3.6.4 Fog Computing

3.6.5 Cloud Computing vs. Fog Computing

3.7 Specific Security Concerns with Fog Computing

4 Security Solutions in IoT

5 AI-based IoT Security Solution Forecasts

6 Security Companies Evaluated

7 Conclusions and Recommendations

Table 6: Europe AI based Security Market 2017 - 2022

Table 7: APAC AI based Security Market 2017 - 2022

Table 8: ME & Africa AI based Security Market 2017 - 2022

Table 9: Latin America AI based Security Market 2017 - 2022

About Us:

Orbis Research ([orbisresearch.com](http://www.orbisresearch.com)) is a single point aid for all your market research requirements. We have vast database of reports from the leading publishers and authors across the globe. We specialize in delivering customized reports as per the requirements of our clients. We have complete information about our publishers and hence are sure about the accuracy of the industries and verticals of their specialization. This helps our clients to map their needs and we produce the perfect required market research study for our clients.
