

Smartphone Market Analysis 2016 (By Segment, Key Players and Applications) and Forecasts To 2022

Smartphone Market 2017 Global Analysis, Opportunities and Forecast to 2021

Smartphone Market 2017 Global Analysis, Opportunities and Forecast to 2021 Pune, India - April 19, 2017 /MarketersMedia/ -- Summary

Domestic mobile handset manufacturers are rapidly gaining a strong foothold in Southeast Asian countries with their feature-rich devices at much more affordable prices compared global vendors such as Apple, Samsung and Microsoft. Domestic smartphone vendors have enjoyed significant success in the Philippines and Indonesia on the back of low-cost devices accompanied with offers on entertainment and social media content and applications. Filipino vendor Cherry Mobile offers 4G mobile at \$299, which has the same specs but costs nearly 30% less than Samsung Galaxy S6 edge. On the other hand some markets like Vietnam have remained challenging for local vendors as consumer in the country tend to favor high-status international brands. Most domestic vendors have followed a specific formula incorporating 4Ps of marketing - product, price, place and promotion - to gain market share of established brands. These homegrown vendors have been facing strong competition from Chinese and global vendors who are responding by introducing devices at low prices to save their market share. Regulations in some countries like Indonesia where government has mandated local production, have benefitted domestic vendors by increasing cost for global vendors.

Key Findings

- o Domestic mobile phone vendors use both online and offline channels to market their products. They are also investing in providing efficient after-sale services to better compete with international brands. Thai mobile has a network of 72 service centers across the country.
- o Local vendors are promoting their offerings through popular celebrities to gain visibility and credibility in the markets, while seasonal promotions such as offering free access to OTT services etc. are also helping vendors to attract customers.
- o Chinese and international device companies pose the greatest challenge for local device manufactures as they offer mobile phones at very low profit margins and enjoy economies of scale owing to international presence.
- o Increasing usage of social media and OTT applications is inducing demand for high-bandwidth smartphones, driving users to switch from feature phones to 3G/4G-enabled smartphones. The vendors have been taking advantage of the trend by offering low-cost smartphones supporting advanced mobile technologies.

Synopsis

'Smartphone Trends in Asia: The Rise of Domestic Brands in Southeast Asia's Smartphone Markets report provides an overview of the strategies domestic mobile phone vendors have adopted in Southeast Asia, including analysis of the major components.

It consists of:
