Global Managed Mobility Services market is accounted for \$3.59 billion in 2015 and is expected to reach \$23.85 billion by 2022 growing at a CAGR of 31.0%. Pune, India - April 19, 2017 /MarketMedia/ -- Summary

According to Statistics MRC, the Global Managed Mobility Services market is accounted for \$3.59 billion in 2015 and is expected to reach \$23.85 billion by 2022 growing at a CAGR of 31.0%. Technological Advancements and rising demand for Bring Your Own Device (BYOD) are some of the major factors driving the market growth. Implementation of mobility services in real life applications and increasing penetration of mobile devices and internet mobility will further fuel the market. However, less adoption of managed mobility in emerging countries is limiting the market growth.

Device management segment is expected to witness the highest CAGR during the forecast period owing to its applications of BYOD and increasing adoption of mobiles. North America accounted for the largest share in the market. While, Asia Pacific is expected to witness the highest share during the forecast period due to increasing adoption of managed mobility services in developing countries.
