Description

Wiseguyreports.Com Adds "Software Defined Networking (SDN) -Market Demand, Growth, Opportunities and Analysis of Top Key Player Forecast To 2022" To Its Research Database

According to Statistics MRC, the Global Software Defined Networking (SDN) Market accounted for \$10.88 billion in 2015 and is expected to reach \$134.51 billion by 2022 growing at a CAGR of 43.2% from 2015 to 2022. Increasing adoption of SDN in enterprise datacenters across a wide range of industry verticals is one of the key factors favouring the market growth. Furthermore, arrival of big data analytics, complicated network traffic patterns, growing services of cloud computing and need for competent infrastructure are the other factors driving the market growth.

North America is the significant market for SDN owing to early adoption of novel technologies such as cloud computing, network virtualization and mobility services. Technological enhancements and high industrialization rate are few of the key factors responsible to the quick growth of the software-defined networking market in this region. However, Asia-Pacific is anticipated to grow at a faster pace during the forecast period.

What our report offers:

- Market share assessments for the regional and country level segments
- Market share analysis of the top industry players
- Strategic recommendations for the new entrants
- Market forecasts for a minimum of 7 years of all the mentioned segments, sub segments and the regional markets
- Market Trends (Drivers, Constraints, Opportunities, Threats, Challenges, Investment Opportunities, and recommendations)
- Strategic recommendations in key business segments based on the market estimations
- Competitive landscaping mapping the key common trends

- Company profiling with detailed strategies, financials, and recent developments
- Supply chain trends mapping the latest technological advancements
