With the emergence of internet across the globe broadband connectivity has become a vital source of information for each and every individual on this planet. Thus the telecom industries are looking forward to lease more number of transponders in order to provide broadband facility to the most isolated places on this globe. Additionally the rising number of video broadcasting subscribers are also driving the satellite transponders leasing market. Several private and public media organizations a authorizing the long term agreement for extending their transponder lease period, because they high growth opportunity in the broadcasting market. Advancement in the channel quality and evolution of high definition channels and UHD TVs is anticipated to fuel the growth of satellite transponders market. Also rising demand for FSS and HTS are expected to generate new opportunities for the market in the coming years. The satellite transponders leasing market is anticipated to grow at a CAGR of 4.43% during the forecast period of 2015-2025 and accounts for US\$ 19,225.3 Mn in the year 2025.

For the better understanding of the market, it has been segmented into three major categories, viz., types of services, bandwidths and application. There are three basic types of services in the market, namely, protected, unprotected and preemptive. The unprotected service is also known as non-preemptible services. Further the market is segmented into different application, which comprises of government and military, commercial, telecom, navigation, remote sensors and research and development. Here, the commercial application is expected to spur the growth of transponder leasing market in the coming years.

Geographically this market is segmented into five major regions, which are North America, Europe, South America, Asia Pacific and Middle East and Africa. North America is currently dominating the market owing to its strong technological foundations. Followed by north America is Europe. Asia Pacific in terms of leased satellite transponders is expected to take over the domination in the long term of this market. The tremendous advancement in the developing economies of Asia Pacific are expected to fuel the growth of satellite transponders leasing market in the coming years.

The key drivers for this market include Growing demand for Fixed Satellite Services and Evolution in

Ka-band and Ku-band services. Innovation and growth in HDTV and video broadcasting are also expected to largely contribute towards the growth of market in the coming years

A detailed analysis on the growth trends, market shares on various dimensions, driving and restraining factors for satellite transponders leasing market, opportunities in the future for these services is provided in the report. A few leading players in the satellite transponders leasing services domain have also been profiled in the report. The profiling of the market players acquaints the reader with their financial information about revenues as well as segment revenues, a competitive SWOT analysis for each player and the recent developments by the player in the Satellite transponders leasing services domain. The key developments are related to the mergers and acquisitions by the players in the recent past.

Global Satellite Transponders Leasing Market - By Services

- o Protected
- o Unprotected
- o Preemptable

Global Satellite Transponders Leasing Market - By Application

- o Government & military
- o Telecom
- o Commercial
- o Research & Development
- o Navigation
- o Remote Sensing

Global Satellite Transponders Leasing Market - By Bandwidth

- o Ku- Band
- o Ka- Band
- o C-Band
- o Others (S, L, X & K)

Global Satellite Transponders Leasing Market - By Geography

- o North America
- o Europe
- o Asia Pacific (APAC)
- o Middle East & Africa (MEA)
- o South America (SAM)
